Kleed. Obsession 34 - Comfort finishing

Create your custom rug!

Various serging and hemming techniques are available for perfect edge finishing.

Home

Home finishing

The rug's edges are finished with yarn in a matching color, and the corners are always slightly rounded. Serging is available with almost all types of rugs.

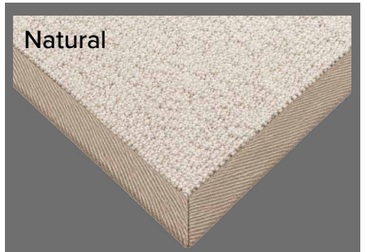

Comfort

Comfort finishing

The rug is finished with a 1 cm wide band, a method known as banding. This finish is applicable to almost all types of rugs, except those with an extremely high pile.

Natural

Natural finishing

The rug is finished with a binding in a natural linen look. This finish gives the rug a calm, stylish appearance and works beautifully with a range of interior styles and our wool qualities.

Supreme

Supreme finishing

An elegant finish that provides a luxurious look and a durable result. The rug comes with a calibra cotton binding all around. This finish is known as blind binding, as no stitching is visible on the long sides of the rug. This gives a clean, elegant and modern look. Blind stitching is possible with a visible side of 1 to 7 cm, depending on the desired look.

Excellent

Excellent finishing

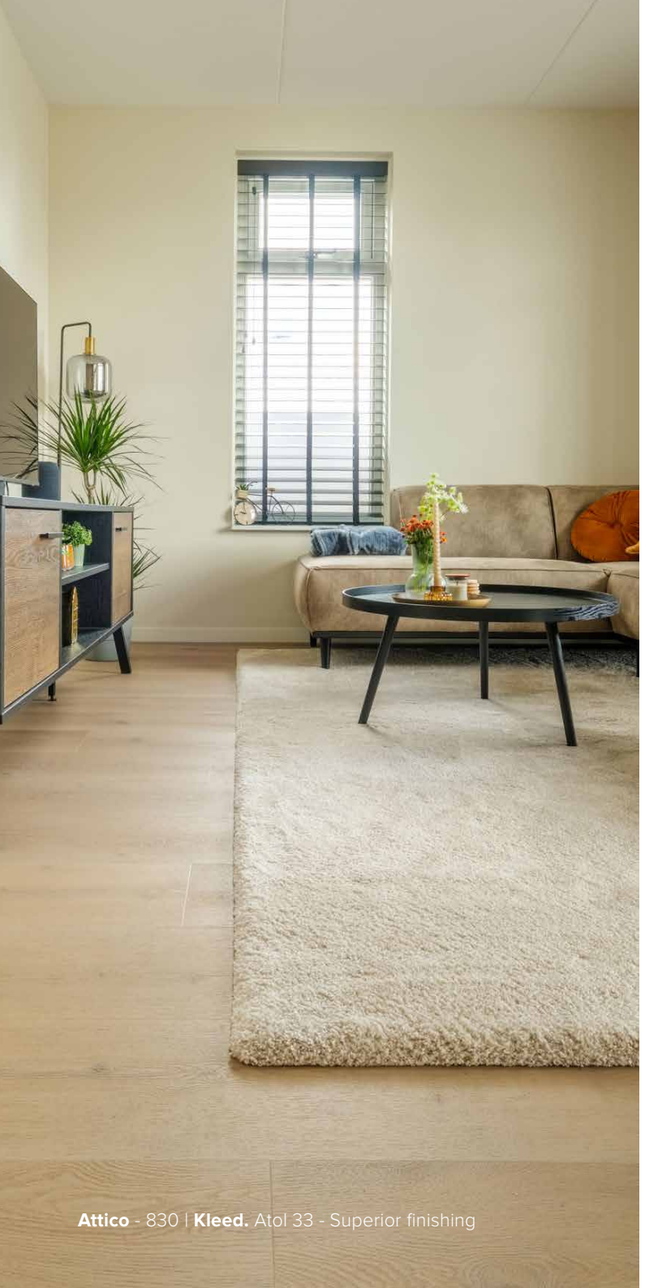

The rug is finished with an elegant, narrow 1 cm suede band. No stitching is visible on the visible side (top) of the rug, ensuring a clean and high-quality look. Thanks to its strong and hard-wearing finish, this border is not only perfect for use in homes, but also extremely suitable for intensive use in public areas. A matching border colour is always chosen to match the rug for a stylish look.

Superior

Superior finishing

With a volume rug, the edges of the rug are folded down towards the underside, giving it a thicker and fuller appearance. The underside is covered with a foam layer, which not only creates extra volume but also provides a non-slip effect (similar to carpet underlay, rubber, or felt). Not all carpet qualities are suitable for this finish; high-pile carpets lend themselves best to it.

This is how you keep your floor looking beautiful!

Mopping, sweeping, or vacuuming? Every floor needs maintenance, and proper care always pays off.

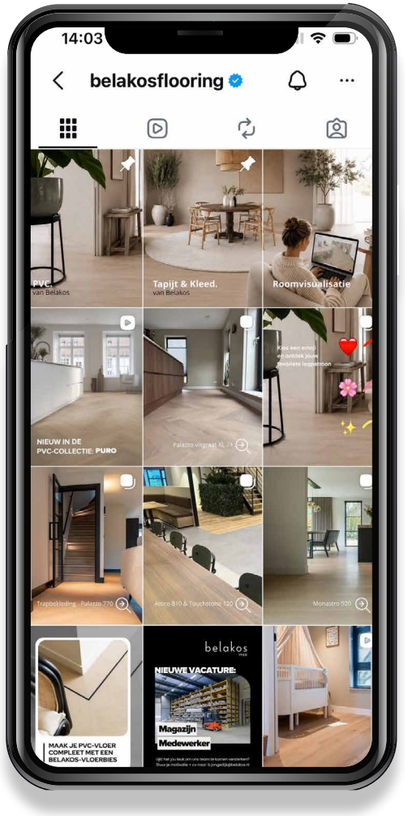

For a fresh and vibrant carpet, regular vacuuming is essential. This removes dust and dirt and helps the fibers stand upright again.

Sometimes extra maintenance is needed. Most household stains can be easily removed with water. How? Check out the standard method suitable for most carpet types.

Want to keep your carpet looking its best?
Check the maintenance advice and discover the James Stain Disc for useful tips!

Maintenance advice and installation instructions can be downloaded at **www.belakos.nl**.
