INDEX

Equipment

- 3 ACT-1224 High Voltage A/C Compressor tester for EV/PHEV**
- 4 ACT-1222 A/C Compressor tester**
- 5 ACT-101P Recover/Recycle & Recharge Station**
- 6 ACT-223 A/C Clutch Tester 12V(24V optional)**

ACT-1224 A/C Electric Compressor Tester

**Worlds first aftermarket Electric A/C
compressor tester for EV/PHEV!**

Test bench ACT-1224 diagnoses electric
AC compressors with a supply voltage of
140-400 VDC

ACT-1222 A/C Compressor Tester

Diagnostics of
the piston, axial
piston, rotor,
and scroll
compressors

R134a or R1234yf

- Tests of all types of 12/24V compressors of belt-driven vehicle air conditioners in both automatic and manual modes
- Check of electromagnetic clutches and control valves for short circuit and open circuit
- Post-maintenance run of compressors
- Pre-sale checks of new compressors-analogs
- Test report and printout

ACT-101P A/C Recover, Recycle & Recharge Station

**Station is used air conditioner
repair and maintenance**

- Universal fixing mechanism for connection to any vehicle model
- Flushing with a pulsating flow
- Post-flushing system drying with nitrogen
- Easy filter replacement
- Small size and mobility

ACT-223 A/C Clutch Tester

Tester is used to perform a quick and easy check of the electromagnetic clutch and control valve

- Presence of a diode
- Current consumption
- Short circuit (cs)
- Circuit break (cb)
- Rate of valve opening
- 12V

Both clutch and valve can be tested either on the compressor removed from a car (at a repair shop) or directly on a car.
