TABLE OF CONTENTS

USB Digital-Audio Converters

DragonFly DACs	7
JitterBug FMJ USB Noise Filter	7
USB Extenders and Adaptors	7

AC Power

Power Conditioners	9
Power Cables	11–12
Power Plugs	12
Adaptors	14
Fog Lifters (Cable Risers)	14

Speaker Cables

Q2	18
Type Series	18
Rocket Series	19
Folk Heroes	20–22
Mythical Creatures	22–24
BiWire Jumpers	25
Fog Lifters (Cable Risers)	25
Binding Post Wrench	25

Audio Interconnect Cables

Bridges & Falls	27
Rivers & Mythical Horses	28
Mythical Creatures	29
Adaptors, Splitters, Couplers	30
PreAmp Jumpers	30

Subwoofer Cables

31

Tonearm & Turntable Cables

33

Vinyl Accessories

GroundGoody Tonearm & Ground Wires	35
Record Brushes	35

Headphone Accessories

Headshell Leads	35
NightBird Headphone Cable	35
Headphone Plug Adaptor	35
Perch Headphone Stand	35

HDMI Cables

8K (48Gbps)	38
4K (18Gbps) & 8K (48Gbps) Long-Length	39
8K (48Gbps) eARC-Priority	39
Adaptors, Coupler	40

Digital-Audio Interconnect Cables

USB Cables and Adaptors	42–43
Optical Cables and Adaptor	44
Digital Coax Cables and Adaptor	45
AES/EBU (Balanced) Cables	46
Ethernet Cables (RJ/E)	47

Accessories

DBS Pack	48
Q-Feet System	48
Fog Lifters (Cable Risers)	48
CleanScreen	48
Sorbothane Self-Stick Sheet	48
Cable Clips	48
Adaptors, Splitters, Couplers	49
Antenna Cables - HD6 Forest	49
RCA, XLR, Coax	
Plugs and Connectors	50
Noise-Stopper Caps	51

Tools

Crimp Tools, Cable Cutters, and Wire Strippers	52
Silver Solder	52

Instant Tool-less Connectors (ITC)

Cable Stripper	53
Bulk Cables	53
Connectors	53

Bulk Speaker Cables (Spools)

CL3/FT4 In-Wall Rated Speaker Cables	54
Speaker Cables — Not In-Wall Rated	55
SureGrip® Speaker Connectors	56
Spade, Pin, and Banana Connectors	57
Termination Pants	57

Bulk Audio Interconnect Cables (Spools)

CL3/FT4 In-Wall Rated Audio Interconnect Cables and Plugs	58
--------------------------------------------------------------	----

Bulk Ethernet Cables (Spools)

CL3/FT4 In-Wall Rated CAT6 and CAT7 Ethernet Cables & Plugs	59
----------------------------------------------------------------	----

Installer Packs

Cables, Splitters and Adaptors in Single, Packs of 5 and 10	60–61
----------------------------------------------------------------	-------

POP Materials

Wall Signs, Tent Card, Window Sticker	62

Terms and Conditions

- Prices are subject to change without notice.
- All prices are in Euro.
- As used throughout this price book, "Retail" carries the same meaning as Suggested Retail Price (SRP).

Returns

- All returns are subject to approval by AudioQuest.
- Built-to-order products may not be returned.
- All sales are final for custom speaker cables produced at 2m or less.
- A Return Merchandise Authorization (RMA) number must be issued by AudioQuest before any product may be returned.
- The RMA number must appear on the outside of the shipping carton, near or on the address label.

AudioQuest: Doing No Harm Since 1980

William (Bill) Low
Founder / CEO

For 40 years now, AudioQuest, headquartered in Irvine, California, has been a leading developer, manufacturer, and distributor of high-performance audio/video products and custom-install solutions. Although best known for our comprehensive range of analog, digital, and AC power cables, our portfolio has expanded to a diverse assortment of products, including the multi-award-winning DragonFly DACs, LYRA, and Niagara and PowerQuest power products.

Our ultimate goal is the same today as it was 40 years ago: Do No Harm! By this we mean that all cables and components, to the extent that is technologically feasible, should get out of the music's way by inducing the least amount of noise and distortion.

The Evolution Continues: The Four Elements Today

While minimizing noise and damage to the audio signal remains the North-Star constant, the ways in which AudioQuest engages these challenges always evolves. While there are still Four Elements that describe our foundational materials and design philosophies, a growing number of technologies cross and even go beyond our original Four Elements. Many have become crucial enough to demand visibility. Noise-Dissipation is an umbrella Element under which many of these meaningful techniques and technologies will reside. While Geometry is no longer identified as one of The Four Elements, it remains inextricably tied to all other Elements of cable design and manufacture.

Solid Conductors: Strand interaction remains the biggest potential source of distortion in cables. Solid Conductors are the aspirational ideal and most complete solution to this problem. However, thoughtfully arranged multi-conductor geometries such as concentric windings are used to create our Semi-Solid Conductor technologies. These avoid many strand-distortion mechanisms and are in their own right ideal in a growing number of applications.

Directionality: All drawn metal conductors have a non-symmetrical, fish-scale-like grain structure. Because the highest Radio Frequencies (RF) are subject to skin effect, traveling on this deformed outer-surface layer of the conductor, there is a resulting increase in RF impedance in one direction versus the other. Since induced RF noise is parasitic (and doesn't travel with the primary signal current), it takes the path of least resistance. At AudioQuest, we test every conductor so it is used in the direction that drains the induced noise away from where it will cause the most harm, optimizing the cable and the system's performance.

Noise-Dissipation: Unwanted Radio-Frequency (RF) noise is and has always been picked up and induced into cable. This contamination ultimately masks and distorts critical portions of the audio/video signal. As this distortion-causing (parasitic) RF signal is more present today than at any previous time in history, we must depend on a wider arsenal of Noise-Dissipation technologies:

- ZERO-Tech (No Characteristic Impedance) applies Ultra-Linear Noise-Dissipation across the widest range of frequencies possible. It also enables uncompressed transient current transfer for AC power and loudspeaker/power amplifier applications.
- RF/ND-Tech (Patented Radio-Frequency Ground-Noise Dissipation) minimizes circuit misbehavior by cancelling induced RF noise.
- Tried-and-true DBS (Dielectric-Bias System) has evolved to include RF-Noise Traps that further reduce dielectric distortion and induced noise.

Metal Quality: Higher-purity conductor metals with smoother surfaces and internal crystal structures greatly reduce noise and distortion. Carefully finessed mixes of metals and conductor sizes can be effectively used to define a cable's Sonic Signature—a cost-effective technique for high-value, high-performance models.

DragonFly

Naturally Beautiful Sound at Your Fingertips—Whenever and Wherever You Want It

With today's smartphones, tablets, and computers, music and videos are far more accessible than ever before.

Unfortunately, the digital-to-analog converters (DACs) inside these devices are highly compromised, even when the sample-rate numbers (24/192, etc.) look impressive. These built-in DACs may make audible sound, but they don't make beautiful music.

A DragonFly bypasses the compromised audio circuitry within these devices to deliver naturally beautiful sound to earbuds, headphones, desktop speakers, or complete audio systems.

Whether using a free streaming service, premium High-Resolution or MQA-encoded streaming (such as Tidal Masters), or playing MP3 files or videos, all DragonFlies make these experiences much more compelling and immersive.

DragonFly Black delivers great performance and value. Red ups the game with more power, more grip, and deeper sonic immersion. Now, DragonFly Cobalt, with its more advanced processor, microcontroller, and RF noise filtering, provides even greater clarity, dynamics, and finesse than previously possible.

DragonFly DAC + Preamp + Headphone Amp

- Plays all music files: MP3 to High-Res and MQA
- Compatible with Apple® and Windows® PCs
- Compatible with iOS devices (requires Apple Lightning to USB 3 Camera Adaptor)
- Compatible with Android devices (requires DragonTail or other USB Adaptor for Android Devices)
- Bit-perfect variable output drives headphones, powered speakers, or power amp
- Fixed output feeds preamp or receiver

	DragonFly Black	DragonFly Red	DragonFly Cobalt
Output	1,2 volts	2,1 volts	
DAC Chip	ESS ES9010 with minimum-phase fast roll-off filter	ESS ES9016 with minimum-phase fast roll-off filter	ESS ES9038Q2M DAC chip with minimum-phase slow roll-off filter for more natural sound
Volume Control	Analog Volume Control	64-Bit Bit-Perfect Digital Volume Control	
Desktop Compatibility	Windows 7 and later; Apple 10.6.8 and later; Linux (no tech support provided)		
Mobile Compatibility	Apple iOS 5 and later; Android 5,0 and later		
Included Adaptor			DragonTail A to C Adaptor
Accessories	Protective Endcap, Leatherette Pouch		
Dimensions	62mm (l) x 19mm (w) x 12mm (h)	62mm (l) x 19mm (w) x 12mm (h)	57mm (l) x 19mm (w) x 12mm (h)

USB Extenders and Adaptors

DragonTail USB Extenders feature 5% Silver Solid Conductors and are Direction-Controlled for reduced RF noise.

DragonTail USB A 2.0 Extender

Female USB A to Male A

Euro Retail: 29,95

DragonTail USB A to Micro Adaptor

Female USB A to Male Micro

Euro Retail: 29,95

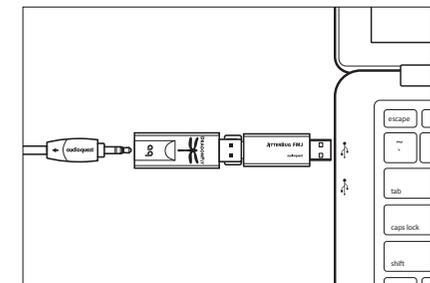

DragonTail A to C Adaptor

(included with DragonFly Cobalt)

Euro Retail: 29,95

JitterBug FMJ USB 2.0 Noise Filter (Data & Power)

- Enables more spacious and compelling sound
- Dual Discrete Noise-Dissipation Circuits reduce all forms of internal noise in both the sending and receiving electronics
- Full Metal Jacket (FMJ) with hinged Carbon-Loaded Noise-Dissipation input cover protects against external noise
- Reduces jitter and packet errors
- Use one JitterBug in series with almost any USB DAC, including DragonFlys Black and Red; experiment with DragonFly Cobalt
- For an additional improvement, use a second JitterBug in parallel—always desirable with DragonFly Cobalt

Euro Retail: 69,00

AC Power Conditioners

Niagara and PowerQuest: Low-Z Power | Noise-Dissipation Systems

Redefining the science of AC power conditioning

What is a power conditioner and why is it necessary?

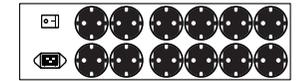

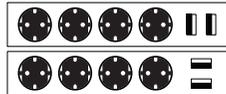

For some, a power conditioner is merely a device that provides enough outlets for the entire audio/video system while also protecting the connected devices from electrical storms and wiring faults. Yet, for the discriminating listener, many power conditioners can make an audio/video system perform far worse.

Yes, a home or building may have dimming lights or an occasional brown-out, and the utilities' AC sine wave is always far from perfect. However, where incoming power is concerned, there are two reasons an audio/video system does not perform up to its full potential: 1) The current transients that supply the power amplifier are compressed, and 2) The ever-increasing levels of radio-frequency noise are masking (covering up) the system's low-level signal content.

When compared to or measured against either Niagara or PowerQuest, a simple power bar or a dedicated AC wall outlet can lose up to a third of the low-level audio information that contain much of a recording's harmonics, imaging, high frequencies, and bottom-end grip—and once that information is gone, it's gone forever.

AudioQuest's Niagara and PowerQuest technologies are unique amongst all power products—whether they're isolation transformers, AC regenerators, battery back-up, re-clocking devices, or other types. Niagara and PowerQuest filters and Ground-Noise Dissipation work evenly, or linearly, across a far wider range of induced noise frequencies. Additionally, Niagaras 3000, 5000, and 7000 feature Transient Power Correction, which supplies a current reservoir to greatly bolster the performance of any power amplifier.

AC Power Cables

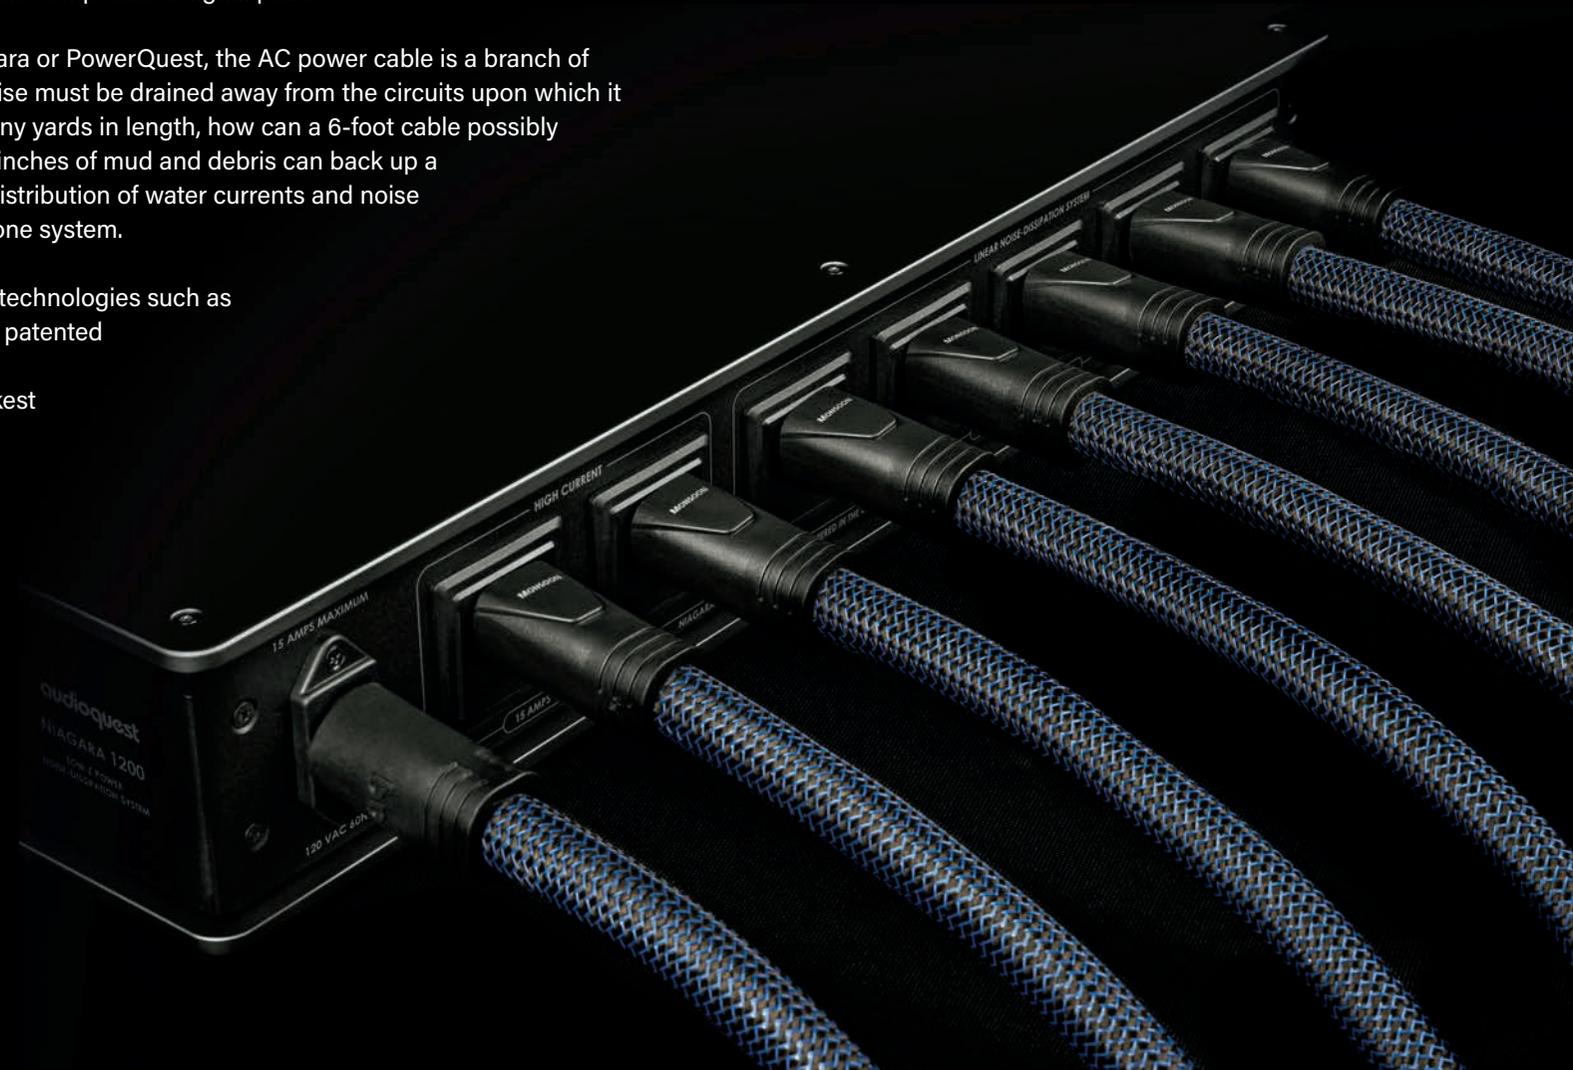

Low-Z | Noise-Dissipation NRG, Wind, and Storm Series

The power cables that are supplied with most audio/video components have many admirable features. They're durable, flexible, small, and they will unfailingly supply the required AC voltage from the utilities' service tap for many years to come. They're also inexpensive.

Unfortunately, these "commodity" power cables were never up to the task of supplying sensitive components with the quality power they need. By this, we mean power that is unrestricted when delivering current transients to a power amplifier. The power cable must not add noise to the audio/video signal via RF (radio-frequency) noise that is induced into, or picked up by, the AV component. The ground lead is the worst offender in this regard, as it has no component power supply to help lessen the damage from the induced RF noise. Typically, the ground noise drains directly towards the component's signal path.

Even with an advanced AC power system like Niagara or PowerQuest, the AC power cable is a branch of noise-dissipation system. Like plumbing, the RF noise must be drained away from the circuits upon which it could do harm. Many ask, if my wall wiring is so many yards in length, how can a 6-foot cable possibly matter? It matters for the same reason four square inches of mud and debris can back up a plumbing system or a rain gutter. The drainage or distribution of water currents and noise currents work in the exact same manner. They are one system.

With AudioQuest AC power cables and our unique technologies such as ZERO-Tech (No Characteristic Impedance) and our patented RF/ND-Tech, you will experience greater dynamics, bass grip, extended high frequencies, and the blackest background you've ever heard.

AC Power Cables: NRG Series

NRG AC cables available in Installer 5-Packs, page 58.

C5
2,5A Maximum RMS
Capacity @ 230VAC 50Hz

Retail: 159,00

Speaker Cables

Meticulously Designed to Minimize Noise and Distortion

Do No Harm: The Four Elements Today

AudioQuest's Four Elements are always applied in the most thoughtful, effective ways to offer the best performance for the money—at all price points. While our implementation of these techniques has evolved over the years, our guiding principle remains the same: *Do No Harm*.

Solid Conductors

Strand interaction remains the biggest potential source of distortion in cables. Solid Conductors are the aspirational ideal and most complete solution to this problem. However, thoughtfully arranged multi-conductor geometries such as concentric windings are used to create our Semi-Solid Conductor technologies. These avoid many strand-distortion mechanisms and are in their own right ideal in a growing number of applications.

High-Purity Metal

Higher-purity conductor metals with smoother surfaces and internal crystal structures greatly reduce noise and distortion. Carefully finessed mixes of metals and conductor sizes can be effectively used to define a cable's *Sonic Signature*—a cost-effective technique for high-value, high-performance models.

Noise-Dissipation

Unwanted Radio-Frequency (RF) noise is and has always been picked up and induced into cable. This contamination ultimately masks and distorts critical portions of the audio/video signal. As this distortion-causing (parasitic) RF signal is more present today than at any previous time in history, we must depend on a wider arsenal of Noise-Dissipation technologies:

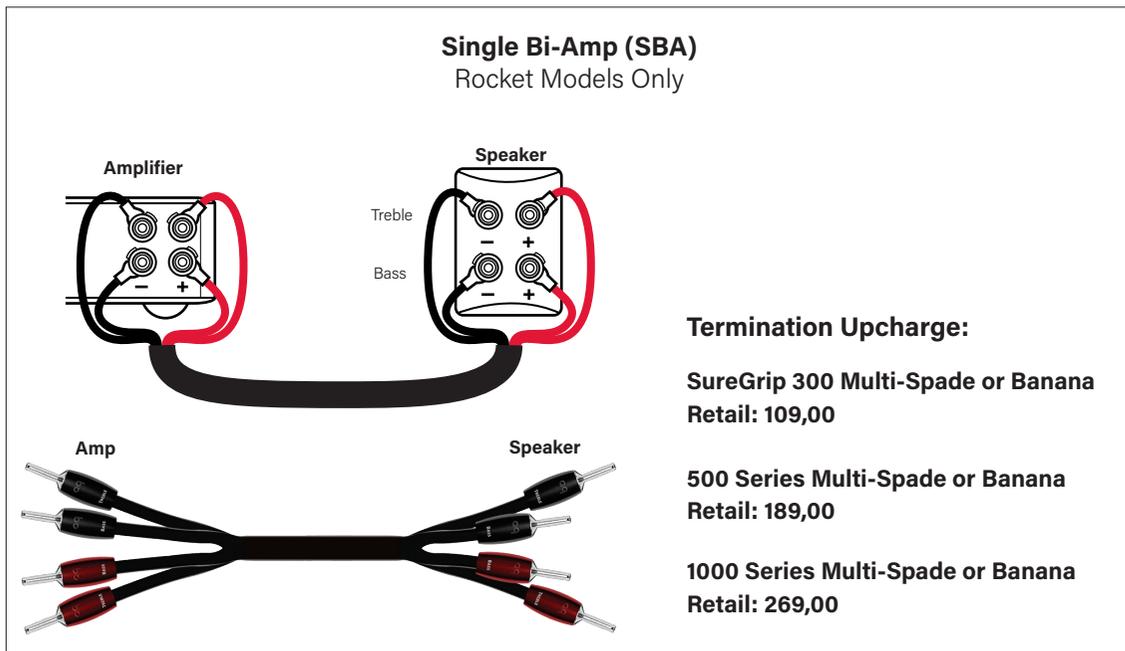

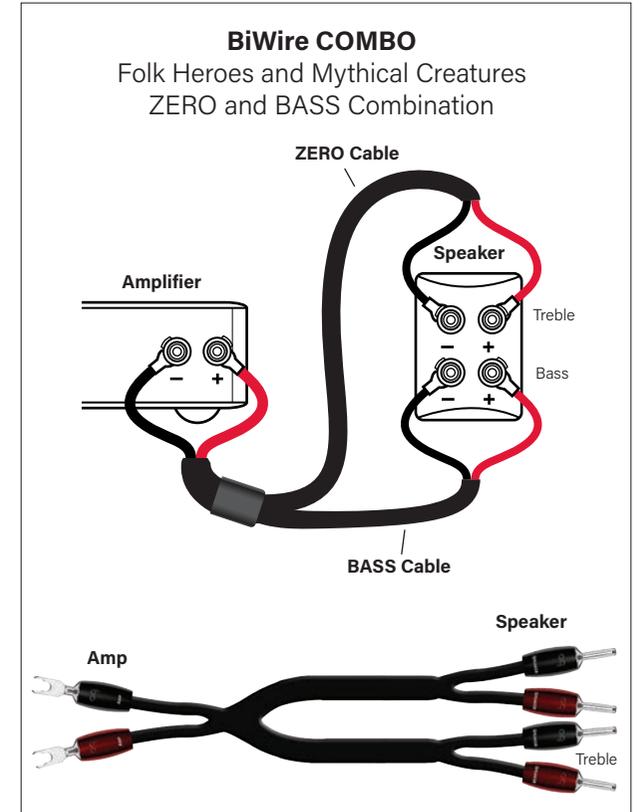

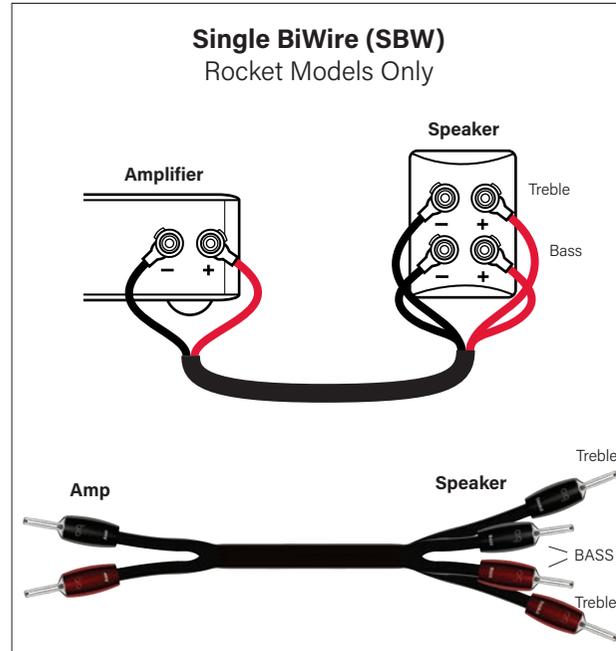

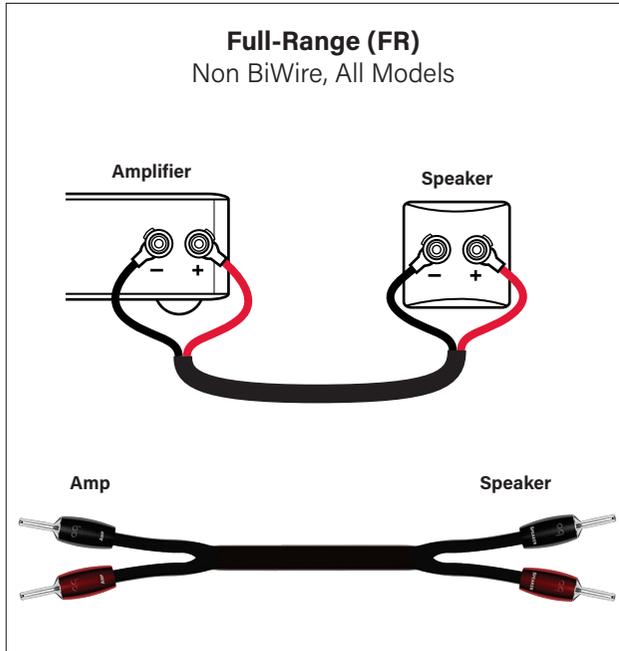

- Directionally Controlled conductors minimize high-frequency noise by “directing” or draining it away from the most vulnerable circuits.
- ZERO-Technology (No Characteristic Impedance) applies Ultra-Linear Noise-Dissipation across the widest range of frequencies possible. It also enables uncompressed transient current transfer for AC power and loudspeaker/power amplifier applications.
- RF/ND-Tech (Patented Radio-Frequency Ground-Noise Dissipation) minimizes circuit misbehavior by cancelling induced RF noise.
- Tried-and-true DBS has evolved to include RF-Noise Traps that further reduce dielectric distortion and induced noise.

Dielectric

Insulation is necessary between conductors to minimize signal interaction and electrical shorts. The ideal is virtually no dielectric interaction (such as is achieved with our ZERO-Technology). However, by optimizing the dielectric material between signal conductors, this distortion is greatly minimized.

Speaker Cable Applications

Mythical Creature & Folk Hero Termination Options: Bananas or Spades?

Amplifier-End Connector:

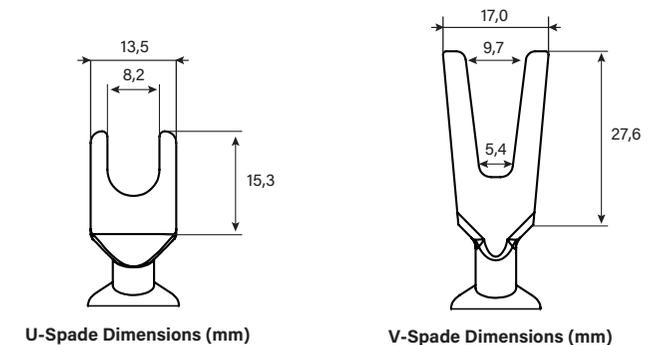

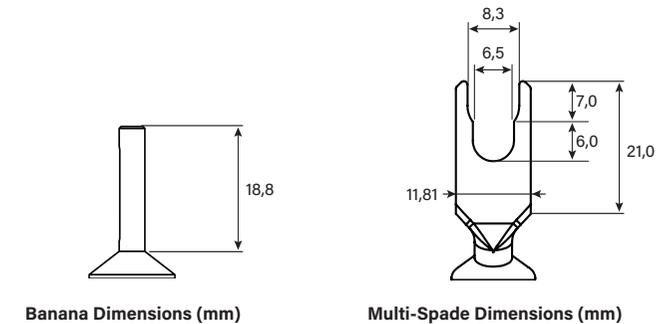

Choice of 1000 Series Multi-Spade, Banana, U-Spade, or V-Spade (Silver only)

Insulated (compliant) binding posts may not allow for 2 sets of connectors.

Often, the choice between terminating speaker cables with spade lugs or banana plugs will come down to personal preference. However, today's EU-compliant isolated binding posts are being used on more power amplifiers than ever before. This sometimes makes it difficult, if not impossible, to use a banana connector. Further, given the girth and weight of our Mythical Creature Series speaker cables, a spade may be better capable of fully supporting the cable. This is particularly a concern with binding posts that do not allow a banana connector to fully seat into the post.

Further, the EU-compliant posts will neither accept our V-Spade nor allow our Multi-Spade to be fully seated. For these applications (or when you're not certain), **we highly recommend the U-Spade**, as it can accommodate any binding post. The V-Spade is a specialty spade connector that works well with large wingnut binding posts (such as the Mundorf), as it allows extra clearance.

Speaker-End Connector:

Choice of 1000-Series Spade or Banana (Silver only)

Here we typically recommend the **U-Spade** or banana connector. However, even though there is less weight and pressure on this side of the cable (particularly for BiWire sets), it is nevertheless important to note the binding post's design. If a banana connector cannot seat all the way into the binding post, we recommend one of our spade connectors.

How to Order Prepared Speaker Cables

First please specify type of connector (banana or appropriate spade), then the finish of connector (silver*).

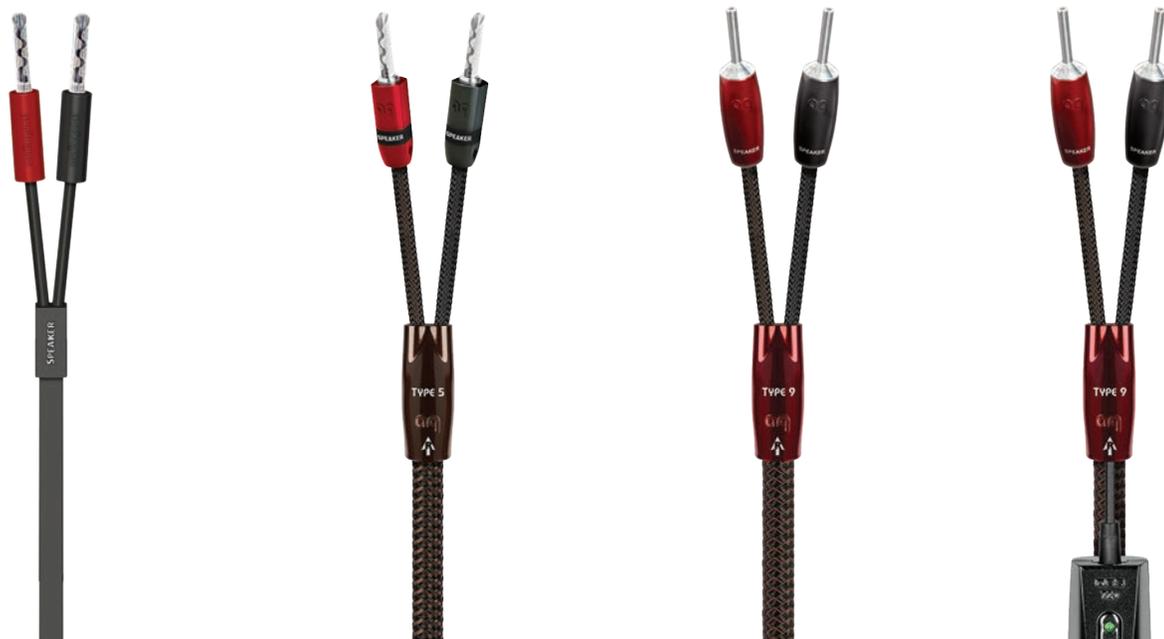

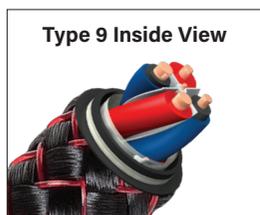

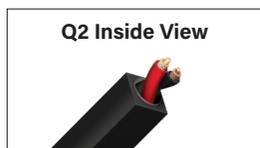

(*or gold where applicable)

Pair prices shown. Also available in singles (i.e. for center channel, subwoofer, or mono) at half pair price.

When ordering any factory-terminated speaker cable, please include the required elements shown in the examples below:

Qty.	Pair or Single	Length	Model	FR/BWC/SBW	Amplifier Termination	Speaker Termination	Silver or Gold

Speaker Cable Accessories

Bare Naked BiWire Jumpers

Solid PSC+ conductors offer dramatically superior performance to stamped jumpers.

Set of 4 (8.9 cm each)
Retail: 49,95

ThunderBird and Dragon BiWire Jumpers

Direction-Controlled Solid Perfect-Surface Copper+ (PSC+) Perfect-Surface Silver (PSS) and Carbon-Loaded Insulation. Available in Spade-Spade, Spade-Banana, Banana-Spade, and Banana-Banana.

ThunderBird (PSC+) uses Hanging-Silver 500 Series Bananas or Spades.

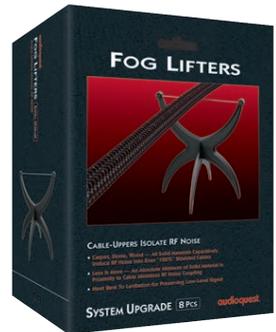

Set of 4 (20 cm each)
Retail: 349,00

Dragon (PSS) uses Hanging-Silver 1000 Series Bananas or Spades.

Set of 4 (20cm each)
Retail: 749,00

Fog Lifters

Reduces the RF noise that capacitively couples into cables through all solid materials (carpet, stone, wood, etc.)

Set of 8
Retail: 159,00

Binding-Post Wrench

Real tool-quality double-ended nut driver with metal inserts.

Fits 11,1 mm and 12,7mm binding posts.

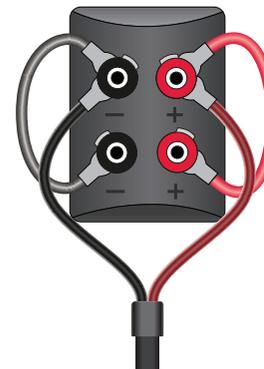

Retail: 19,95

Using BiWire Jumpers with Full-Range Cables on BiWire Capable Speakers

3-Way or Panel-Hybrid Speaker

Please connect amp. directly to the critical midrange and tweeter Treble input, and then jumper down to the Bass input.

2-Way Speaker

To maintain the speaker design's delicate midrange/tweeter relationship, please connect signal to Treble (+) and Bass (-).

Audio Interconnect Cables

The Higher You Climb, The Less You Hear?

The evolution of AudioQuest's audio cables is a steady climb up a mountain whose summit we'll never reach — there is always room for improvement and growth, as evidenced by our new Mythical Horses and Mythical Creatures interconnects. Perhaps less intuitive is the fact that climbing up our Analog Interconnect line means you hear less of the cable.

The reason is simple: As more of the delicate audio signal is protected from damage along the way, the listener experiences more of the truth and emotional impact of the music. Greater faithfulness to the audio signal is made possible by the use of superior materials and the careful implementation of increasingly sophisticated design and construction techniques.

Music is wonderfully complex, and our ears are very sensitive to its nuances. The remarkably affordable Bridges & Falls Series is an amazing place to start the journey. For those who want better performance and can sacrifice the physical flexibility and diverse connectivity options afforded by Bridges & Falls, the Rivers and Elements are excellent choices. Every step up the ladder to the state-of-the-art Mythical Creatures Series delivers even more clarity, smoother and more natural sound, greater dynamic slam, and more nuanced expression from the music.

As you climb with your customers, you'll hear progressions in metal, from Solid Long-Grain Copper to Perfect-Surface Copper+, and PSS Silver; in Geometry, from Double- to Triple-Balanced; in insulation, from Foamed-PE to FEP Air-Tubes; and in Noise-Dissipation techniques, from Metal-Layer to Carbon-Layer to Graphene/Carbon Mesh-Network and our patented Dielectric-Bias System. And finally, in our newest "Mythical" interconnects, ZERO-Tech, which eliminates the cable's characteristic impedance for an even more "invisible" sonic signature.

Throughout the line, the AQ performance-driven value system is always 100% evident. Climb until the incremental cost of the higher model is no longer the least expensive way to make the most improvement — but don't be surprised if your customers find themselves at the top of the line before reaching that point!

GroundGoody Tonearm & Ground Wires

Unlike other ground wires that act as radio-frequency antennas, ThunderBird and Dragon GroundGoody's prevent hum while efficiently dissipating radio-frequency noise. GroundGoody's use premium conductor materials that are controlled for direction and cold-welded to Direct-Silver Plated #10 size spade lugs. Further, AudioQuest's RF/ND-Tech dissipates and cancels most induced radio-frequency noise.

HDMI Cables

Does AudioQuest offer the right HDMI cables for 4K TVs, 8K TVs, and beyond?

Yes! All of AudioQuest's new 48Gbps HDMI cables can transfer up to professional 10K Ultra-HD video. The impressive 48Gbps data rate is made possible by four balanced audio/video pairs capable of 12Gbps each. And, of course, the latest technology is backwards compatible with 4K displays.

Video Up to 10K

AudioQuest 48Gbps HDMI cables are completely backwards compatible with existing devices and have the bandwidth required for video with resolutions up to 10K and resolutions/refresh rates up to 8K/60 and 4K/120.

HDR (High Dynamic Range)

All AudioQuest HDMI cables support HDR (High Dynamic Range) and Dynamic HDR. HDR content expands the contrast of the image for blacker blacks and brighter whites/highlights as well as greater color saturation and brightness. In addition, 4K Ultra-HD content allows for a wider color range.

This combination of technologies results in more realistic HDR images with greater perceived depth. Dynamic HDR (HDR10+ and Dolby Vision, for example) enables frame-by-frame HDR optimization rather than HDR settings that are fixed for the entire program. The most prominent current HDR formats are HDR10, HDR10+, and Dolby Vision.

AudioQuest 18Gbps and 48Gbps HDMI cables are compatible with all varieties of HDR, which can be found on Ultra-HD Blu-ray, and all major streaming services, including Netflix, Amazon Prime, Disney+, Apple TV+, and others.

ARC (Audio Return Channel) and eARC (enhanced Audio Return Channel)

HDMI's Audio Return Channel (ARC) sends audio from a TV to a soundbar or AV receiver for greater simplicity and flexibility in system setup. Hardware's previous ARC capabilities max out at lossy (compressed) 5.1-channel surround sound.

Today's HDMI 2.1 hardware supports enhanced Audio Return Channel (eARC), which increases the digital bandwidth dramatically to support uncompressed and lossless high-resolution multichannel audio, including Dolby TrueHD and Atmos, and DTS-HD Master Audio and DTS: X.

8K-10K

eARC

48G_{bps}

Not only do all current generations of AudioQuest HDMI cables have the conductors and bandwidth required for eARC's enhanced sonic capabilities, but, in order to ensure superior audio performance, the ARC-channel conductor-pair is internally controlled for direction, running in the opposite direction from the 4 pairs that carry information to the TV.

Finally, AudioQuest's eARC-Priority models include 4 Silver-Plated Forest 48-level audio/video data pairs—but with a far superior single data pair for the TV's audio output. By upgrading the ARC data path only, audiophile quality is made possible at a fraction of the cost of upgrading all 5 data pairs.

New Packaging

AudioQuest has turbo-charged all of its HDMI packaging with easy-to-read icons and explanations of the design and material elements that define each cable and its place in the line. Comparing, contrasting and selecting the right cable is easier than ever before.

1.25% SILVER

Solid Conductors

Solid Long-Grain Copper, Silver-Plated Copper, or Perfect-Surface Silver maximize Noise-Dissipation and overall performance.

LEVEL 3 Carbon Mesh-Network

Noise Dissipation

Six Levels of Noise-Dissipation (ND) combat distortion caused by RF Noise contaminating digital and analog circuitry.

eARC

1.25% Silver Level-3 ND

Because sound is where all the emotion and drama comes from, AQ's eARC channel gets 100% the same love as the four AV channels.

Limited

Lifetime Warranty

We've got your back. Performance backed by reliability.

48G bps

4 x 12 = 48

The 48Gbps necessary for all of HDMI's new and future features is made possible by upgrading the 4 AV channels from 6 to 12Gbps.

HDMI: 0,75m–5m Cables

18Gbps 4K and 48Gbps 8K-10K

- All models use Solid Signal and Ground-Reference Conductors.
- All 19 conductors (A/V, eARC, Ground-Reference Drains, Control, Power) are Direction-Controlled.
- AudioQuest "48" HDMI cables have the bandwidth required for video with resolutions up to 10K, resolutions/refresh rates up to 8K/60 and 4K/120.
- For long-length models (Pearl 18, Forest 18, Root Beer 18, Cherry Cola 18, and Cherry Cola 48), see page 37.

HDMI: eARC-Priority Cables

48Gbps 8K-10K

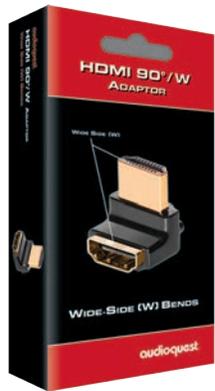

- When using a TV's eARC/ARC output as the audio source to a soundbar or an A/V receiver or an amplifier's ARC input, eARC-Priority models offer their namesake models ARC performance for less than half the price of the namesake model. This is possible because the cables' unused A/V data pairs "only" offer better-than-Cinnamon 48 performance.

Digital-Audio Interconnect Cables

Perfect Sound Forever?

That bold statement introduced CD players to the world back in 1983. Those claiming perfection believed ones and zeros to be so beyond reproach that traditional concerns about the integrity of the playback system had become irrelevant overnight. But the CD wasn't close to perfect. Those who listened quickly figured out that the equipment and cables in the audio system mattered every bit as much as they had in the analog era.

However, to this day, stating the truth in public that digital-audio cables can make minor to even staggering differences in an audio system's performance is like yelling, "food fight" in a crowded cafeteria—you'd better get ready to duck because there will be incoming.

Yet, the same kind of music lovers and listeners who heard the CD for what it is also know that soul-satisfying digital-audio playback requires the best digital-audio cables. And the best cables reduce the most noise and distortion.

Today, there are more ways to consume digital audio than ever. Many gave up silver discs for the convenience of inferior-sounding compressed downloads, and now we've seemingly got the best of both convenience and performance: We are able to stream high-res files to our phones and mobile devices and into our homes.

AudioQuest's digital-audio cables employ all of our proven techniques for minimizing noise and distortion: better metals, better geometry, better dielectric, Dielectric-Bias System (DBS), Noise-Dissipation, Direction-Controlled Conductors, and other ingredients needed for optimizing each specific application.

The digital future is brighter and more beautiful sounding than ever...*if* your digital-audio cables are capable of treating fragile audio data as it deserves to be treated—that is, with the love and respect reserved for music.

USB Cables

All USB A - C, USB C - B, USB C - C, Micro B, and Lightning cables are available in 0,75m and 1,5m lengths only.
For optimal sonic performance, all AudioQuest USB cables are Hi-Speed with a maximum signaling rate of 480Mbps.

Pearl available in both 3,5mm Mini to Full-Size, and Full-Size to Full-Size.

Forest, Cinnamon, Carbon, and Vodka come in Full-Size to Full-Size with 3,5mm Mini Adaptor included.

Optical Accessory

Optical Mini Adaptor

Euro Retail: 17,95

Digital Coax Cables

Forest available in Installer 5-Packs, page 61.

RCA > BNC

Recommended for Forest through Diamond.
Fully acceptable for Wild and WEL when BNC needed only on one end, or to keep an RCA/RCA cable universally useful.

Euro Retail: 19,95

Accessories

Level-X DBS Pack 72v + Noise-Dissipation

- Niagara Custom-Built Noise-Trap Dissipates RF Noise
- 72v Dielectric-Bias System Reduces Dielectric-Noise

Euro Retail Each: 139,00

SorboGel Q-Feet System

Set of 4 energy-absorbing feet each with a "tray" which improves performance and protects furniture. Each foot supports up to 4 kg.

Euro Retail: 159,00

Fog Lifters

For use with audio and AC power cables, Fog Lifters reduce the RF noise that capacitively couples into cables through all solid materials (carpet, stone, wood, etc.)

Set of 8 Euro Retail: 159,00

Cable Clips

Fast and easy way to hold AudioQuest's largest cables in place.

AC Power Cables:

- Thunder, Tornado, Hurricane, FireBird, Dragon

Speaker Cables:

- Robin Hood, William Tell
- ThunderBird, FireBird, Dragon

Interconnect Cables (RCA and XLR):

- ThunderBird, FireBird, Dragon

Set of 6 Euro Retail: 10,00

CleanScreen Kit

150 ml. Bottle + 10 ml. Spray + Retractable Brush

Euro Retail: 29,95

Sorbothane Self-Stick Sheet

15,24cm x 15,24cm x 0,25cm sheet can be cut to size to damp anything, especially effective on top surface of speaker stands.

Euro Retail: 54,95

Binding-Post Wrench

Real tool-quality double-ended nut driver with metal inserts.

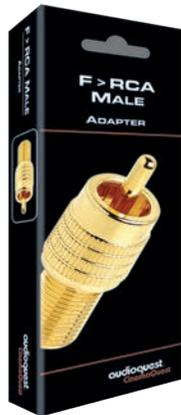

Fits 11,1 mm and 12,7mm binding posts.

Euro Retail: 19,95

Tools

All the Tools necessary to Cut, Strip, Prepare, and Terminate any AudioQuest Cable

Cat6/6a/7 Crimper Tool and Die

Includes Cat6 and Cat 7 Die

Cat6 Die

Also sold separately

Rivers Interconnect Crimper Tool

Use with either AudioQuest Chicago RCA, Red River and Mackenzie RCA or XLR plugs.

AQ Ratchet Crimper Tool

For up to 8 AWG Conductors

Klein Crimper Tool

For connectors up to 10 AWG

Klein Cable Cutter

Wire Stripper/Cutter/Plier Combo Tool

Ideal Articulated Stripper

For 8–22 AWG Conductors

Paladin Jacket Stripper

Cleanly and easily removes the jacket on all AudioQuest Interconnect and Speaker Cables

AQ Silver Solder

Easy to use. Clearly sounds better.

Installer Packs

Cables and Accessories in Installer-Friendly bags instead of hanging boxes.

Installer Packs provide exactly what you need to get the job done. Each Pack includes a number of high-value, high-performance AudioQuest pieces and comes with convenient integrated labels that you can peel off and place on your invoice. No retail packaging, no garbage in your truck, no excess waste or cost.

AudioQuest Branded Promotional Items

Polo Shirt

Our versatile polo shirt looks great with anything. Classic black with a discreet silver AudioQuest logo.

Men's sizes: S-2XL; Women's sizes: S-XL.

T-Shirt

Our classic crewneck t-shirt is made from 100% lightweight, preshrunk cotton for a perfect fit that's as attractive as it is comfortable. Our t-shirt features a tasteful red AudioQuest logo against a solid black background.

Sizes: S-3XL

Chino Washed Cotton Baseball Cap

Our baseball cap has a durable 8-stitch bill for a long-lasting, contoured shape. The Velcro fastener provides easy adjustments for a perfect fit. Available in black with red AudioQuest logo and trim, this cap looks and feels great. One size fits all.

Beanie

Red, gray, and black, with our classic red AudioQuest logo, our stylish beanie is made from super-stretch, fine-gauge acrylic, for a warm, snug fit over your head and ears. The perfect accessory for those cooler days. One size fits all.

Pen

Take note: With its discreet AQ logo, piano-black lacquered tube, and chrome accents, this ballpoint pen has the looks to match the quality of your prose. Keep it in your AudioQuest backpack and take it with you wherever you go.

Water Bottle

Made by Specialized, this 769ml leak-proof water bottle has a self-sealing valve and features easy-to-squeeze BPA-free, recyclable plastic. Our distinct Wolves artwork is printed with a non-solvent based, CPSC-approved ink. Just aim and squeeze for clean, pure refreshment.

AudioQuest Branded Promotional Items

License Plate

It's all about the journey. Take your love for AudioQuest on the road with this license-plate frame. The clean, simple design features our red AudioQuest logo and "Experience the Difference" mantra set against a black background—perfect for any ride. Vroom!

Backpack

Available in black with our black AudioQuest and Four Elements logos. Accommodates laptops with 13" screens and tablets. Made of nylon.

Padded Backpack

Do no harm with our padded backpack. It features a discreet front-panel zipper, multiple internal pockets, and mesh side pockets for drinks and other items. A padded laptop insert safely accommodates screens up to 15". Mesh backing and straps are durable and comfortable, making the backpack as easy to carry as it is to wear.

Tote Bag

This super-durable tote bag is made of water-repellent polyester and has a long strap that fits easily over a shoulder. Measuring 38cm x 36.5cm, its slim pocket is perfect for carrying AudioQuest merchandise—pens, tumblers, price books—and even an LP or two! The simple black-on-black design features a subtly stylish AQ logo.
