## Hello from Davone

With production and development based in Denmark, a country renowned for its design and acoustics, Davone has build loudspeakers by hand since 2007. The combination of the highest quality in sound and design makes Davone a pioneer in High-End audio.

Following Danish traditions, a flexible and small scale production gives Davone the freedom to experiment and implement ideas that would not be possible to sustain in large scale production. This enables us to only make innovative products we are really proud of. And we know that the Davone customers appreciate this extra effort.

With long lasting ownership in mind, the focus is on enjoying music. And with their signature appearance, the Davone loudspeakers offer more than High-End sound quality alone. A far cry from mass produced anonymity, the timeless Davone loudspeakers remain intriguing for many years to enjoy in sound and design.

Paul Schenkel and Debby van Hal

## Reference One

No compromise. Is the best way to describe the new Davone flagship model. With precise engineering guiding us every step of the way, we have created a loudspeaker that excels in making music sound more beautiful than you are used to. Sounding clean, natural and unconstrained, hidden subtleties in the music are revealed while always remaining laid back, like only the best loudspeakers can.

- Advanced Beryllium tweeter
- Textreme carbon fiber midrange loudspeaker
- 10" fast and powerful woofer
- Very stiff cabinet made of 25 mm form pressed wood with extensive bracing and internal Helmholtz absorbers

		Retail per pair
	Black, real leather Quarter cut walnut veneer	€18.000,-
	Soft-white, real leather Quarter cut walnut veneer	€18.000,-

## Reference Two

With its roots in the Reference One, the Reference Two is of similar no compromise acoustic design. Despite its more compact design, the sound similarities are uncanny, a testament to the design quality. The best way to describe the R2 is revealing yet easygoing, with a very well-controlled bass. Once you start listening, you're hooked.

- Advanced Beryllium tweeter
- 7,5" Multimodal Textreme membrane with distributed low energy breakup modes
- Very stiff cabinet made of 25 mm form pressed wood with asymmetrically placed wave reflectors and internal Helmholtz absorber

		Retail per pair
	Quarter cut walnut veneer	€12.000,-

## Wireless Transmitters

A WiSA transmitter is all you need to connect your wireless Davone loudspeaker to your system.

WiSA is a wireless audio standard and several transmitters are available, each with their own unique benefits. Our recommended transmitter is the WiSA SoundSend. The SoundSend is a very basic and therefore also reliable design. Other more complex transmitters can be more troublesome in our experience and are therefore not recommended.

Wireless DSP options and accessories		Retail per piece
	WiSA SoundSend - 3rd party vendor. The SoundSend is perfect for stereo or multichannel home cinema use over HDMI-ARC. Another great application is to connect the SoundSend over Toslink to a reliable streamer from Bluesound, Sonos or Heos.	€250,-
