

EF PACKAGING

THE FLEXIBLE PACKAGING SOLUTION

MPS proudly presents the EF Packaging press, a powerful addition designed to meet the demands of the flexible packaging market. Building on the acclaimed MPS EF narrow web press series, the EF Packaging Press extends capabilities to flexible packaging and shrink sleeve applications with an impressive 26" web width, opening new opportunities for label converters and flexible packaging businesses.

Invest in Your Future

The EF Packaging is more than new equipment; it's an opportunity to enhance your capabilities and stay competitive. With its wide format, automation features, and customization options, it drives efficiency and profitability.

Fully Customizable

Customize to Your Needs

The EF Packaging is fully customizable, with optional modules including:

- Rotogravure and solvent based flexo units for printing whites, metallics or special coatings
- Turner Bars for reverse-side printing
- Lamination modules for producing laminated material in one pass

Applications

The EF Packaging Press excels across various applications, including:

- Wrap-around Labels
- Shrink Sleeves
- Flexible Packaging
- Laminated Products
- Filmic Labels

With unmatched flexibility and precision, the EF Packaging empowers your business to tackle even the most complex print jobs effortlessly.

Key Features

MPS is a leader in the printing industry, and the EF Packaging exemplifies our commitment to innovation.

- **Crisp.Dot Technology:** Unmatched print quality on any substrate.
- **E-Sleeve Technology:** Quick changeovers and reduced downtime with lightweight aluminum E-Sleeves.
- **Fast-Change Ink Chamber:** Minimizes ink waste and enables rapid ink changeovers with ergonomic handling.

Advanced Automation

- **Automatic Mark-to-Mark Register Setting:** Perfect alignment and reduced waste.
- **Dynamic Impression Settings:** Faster job setups with consistent quality.
- **MPS Virtual Coach:** Real-time operator guidance for peak efficiency.
- **MPSCoconnect Platform:** Enhanced service and support for optimal performance.
