

ESD ELECTRONIC PLIERS CLASSICLINE

The pliers in the CLASSICline series are characterised by their high-gloss electropolished surface, which is very resistant to corrosion, without friction and microcracks, extremely smooth and free of particles.

The heads are ideal for working on small components. The pliers sit perfectly in the hand thanks to their two-component protective covering, which is ergonomically shaped, dissipative and features an individually adjustable double leaf spring. The smooth box joint guarantees a long service if cared for properly.

The pliers have been tested with great results in accordance with DIN EN 61340-5-1, 61340-2-1 and 61340-2-3, as well as for work in ESD protected areas.
