

MYP Subject Areas

At International School Utrecht MYP students study the following subject areas: Language and Literature, Language Acquisition, Individuals and Societies, Sciences, Mathematics, Arts and Design.

Language and Literature

The school offers English and Dutch. Additionally, in compliance with the IB philosophy, the school encourages students to keep up their home language(s).

Language Acquisition

Also known as a modern foreign language. The school offers Dutch, Spanish for grades 6, 7, 8, 9 and 10 and English for grades 6, 7 and 8, however the school provides additional support for students in grade 9 and 10.

Individuals and Societies

This is an integrated programme for all five years of the MYP. Students will study topics in economics, business, psychology, geography, history, and sociology. In grade 10, students will have the option to take an additional business course, in preparation for the Diploma Programme.

Sciences

In grades 6, 7, 8 and 9 students take an integrated science course, covering topics such as ecology, earth science, space, physics, biology, and chemistry. In grade 10 students study biology and chemistry with the option of physics, in preparation for the Diploma Programme.

Mathematics

In grades 6, 7 and 8 the levels are integrated, and students are extended accordingly. In grades 9 and 10, standard and extended levels are taught as separate courses. I

Arts

The school offers music, visual arts, and drama over the course of five years of the MYP.

Physical and Health Education

This is an integrated programme for all five years of the MYP. There are indoor and outdoor sports facilities, and a theory course is provided.

Design

This is an integrated programme for all five years of the MYP. Design is a combination of ICT and design technology.
